PROFESSIONAL SUMMARY

Computer Science student interested in cybersecurity, network security, and ethical hacking. Familiar with security tools, Linux, and vulnerability assessment.

EDUCATION

B.Tech Computer Science
XYZ University
2023 - 2027
CGPA: 8.4/10

TECHNICAL SKILLS

Languages: Python, C++, Bash
Security: Network Security, OWASP, Vulnerability Assessment
Tools: Wireshark, Nmap, Burp Suite, Metasploit
Operating Systems: Linux, Windows
Databases: MySQL

PROJECTS

Network Security Scanner
- Built a Python-based network scanning tool.
- Used Nmap to identify open ports and running services.
- Generated reports for detected services.

Web Vulnerability Scanner
- Developed a basic Python tool for detecting common web vulnerabilities.
- Tested applications against common OWASP vulnerabilities.

EXPERIENCE

Cybersecurity Intern
SecureNet Technologies
June 2026 - August 2026

- Assisted with vulnerability assessments.
- Analyzed network traffic using Wireshark.
- Documented security findings and recommendations.

CERTIFICATIONS

CompTIA Security+
Google Cybersecurity Certificate

ACHIEVEMENTS

- Participated in university CTF competition.
- Completed 100+ cybersecurity labs.
